Summary

The applicant is really hardworking and focused in coding. Have few experiences and built some projects but certainly willing to explore more in the tech industry.

Experience

Full Stack Developer

Global Mobility Service Inc.

Jan 2023 - Present (6 months)

- Currently doing a website for internal use and external use. Used existing APIs from an IoT device that is being used by the company for its clients. Worked in a team of two co-developers, a Project Manager and a Quality Assurance and used Scrum approach for project management.

Software Engineer

Accenture

Jan 2022 - Jan 2023 (1 year 1 month)

- Utilized the tech stack Angular JS for frontend, PostgreSQL for the database, and Node.js for the backend development to develop and deploy the new Collections page of the Accenture website used by employees for reference on a wide variety of topics concerning the company.

- Converted and migrated code from the old collections website that used Visual Basic, .NET and MySQL to Angular JS, Typescript and Node.js code. Made the new Collections to give the Collections page a much modern look by doing UI/UX enhancements.

- Used AWS Services to create LAMBDA functions and APIs to be used in the development.

- Worked in a team of one Scrum Master or Team Leader, two testers and three co-developers. Used Scrum approach, a framework of project management, that gives us a structure to effectively collaborate as a team.

Software Developer

Proxa Limited

May 2021 - Sep 2021 (5 months)

- Used MERN(MongoDB, Express JS, React.js, Node.js) Stack to develop the client's e-commerce website(20price.com) that is based in Hongkong.

- Created scripts for automated software testing in Cypress JS to easily test if there are UI/UX bugs in our client's website.

Web Development Intern

Intellicare

Sep 2019 - Jan 2020 (5 months)

Education

Zuitt - Coding Bootcamp

Postgraduate/Certificate course, Web Development

2020 - 2021

A Full Stack Web Development Bootcamp that focused on teaching front-end technologies like HTML, CSS, Javascript, React JS, Next.js and backend technologies like MongoDB, Express JS, Node JS,
