SUMMARY

Full Stack Developer with 4 years shipping production web applications. I own features end to end: frontend, backend, database, and deployment. I have worked in agile Scrum teams, modernized legacy systems, and lately, I've been building with AI. In my current role I also do sales — so I translate fluently between technical work and business outcomes.

EXPERIENCE

Full Stack Developer

Go-El Electrical Products Trading

- 📅 08/2023 - Present 📍 Manila, National Capital Region, Philippines
- Increased our company sales by up to 10% by creating and managing our Shopee page.
 - Utilized WordPress to launch the company's website, go-elshop.com.
 - Used Shopify to launch the company's e-commerce website.
 - Created an inventory and sales management system using MERN Stack.

Sales Manager

Go-El Electrical Products Trading

- 📅 01/2024 - Present 📍 Manila, National Capital Region, Philippines
- Increased sales by up to 20% by running Meta Ads and Facebook ads.
 - Managing people to guide them in selling our products more effectively.
 - In charge of talking to our valued suppliers.

Full Stack Developer

Global Mobility Service Inc

- 📅 01/2023 - 06/2023 📍 Makati, National Capital Region, Philippines
- Developed and maintained a web portal for internal and external users, integrating existing APIs from IoT devices
 - Contributed to a development team, following Scrum methodologies to deliver project milestones efficiently
 - Collaborated closely with the Full Stack Developer, Senior Full Stack Developer, Project Manager and Quality Assurance team to ensure high-quality software delivery

Full Stack Java Developer

Collabera Digital

- 📅 01/2022 - 01/2023 📍 Makati, National Capital Region, Philippines
- Developed and deployed the new page of the Accenture website, utilizing Angular JS for frontend, PostgreSQL for database, and Node.js for backend development
 - Successfully converted and migrated legacy code from Visual Basic, .NET, and MySQL to Angular JS, TypeScript, PostgreSQL and Node.js for modernizing the website
 - Implemented significant UI/UX enhancements, resulting in a modern and intuitive user experience for the Collections page
 - Created and integrated LAMBDA functions and APIs using AWS Services to support development requirements
